

Topgyal Gurung

NEW YORK, NY 11370 | 3479359179 | topgyal.gurung@gmail.com | linkedin.com/in/topgyal | GitHub.com/topgyalgurung

Full Stack Software Engineer with a CS degree and strong backend expertise. Experienced in designing scalable systems, deploying full-stack applications and building secure APIs. Skilled in JavaScript, TypeScript, Python, SQL, modern frameworks, data engineering, security-focused development, and cloud/AI tools (AWS, BigQuery, LLM integrations). Adept at translating complex requirements into reliable, high-impact solutions.

Technical Skills

PROGRAMMING & LANGUAGES: JavaScript, TypeScript, Python, Java, C++, SQL, HTML, CSS, Shell Scripts
FRAMEWORKS & LIBRARIES: React, Next.js, Node.js, Express, Spring Boot, Tailwind CSS, Docker, Kubernetes
DATABASES & CLOUD: PostgreSQL, MongoDB, GCP BigQuery, AWS (Developer Associate in progress)
APIs & TOOLS: REST, GraphQL, Google Maps, Cloudinary, Stripe, Git, GitHub Actions (CI/CD), TDD, Vim
AI & EMERGING TECH: Vercel AI SDK, LangChain, OpenAI APIs, LLM application development
CERTIFICATIONS: Python for Everybody, CodePath Cybersecurity, Big Data Analytics with Hadoop & Spark

Project Highlights

Finance Dashboard | GitHub | Live

July/2025

- Built a fully functional Next.js dashboard app with protected routes enabling users to add, edit, and delete invoices connected to PostgreSQL database.
- Leveraged search, pagination, streaming, caching, server actions, form validation, NextAuth.js to ensure dynamic, reliable, and efficient data management.

E-commerce Backend API | GitHub

July/2025

- Built a production ready backend using Java, Spring Boot, MySQL, and Spring Security, implementing authentication, role-based authorization, and Stripe payments, ensuring secure and scalable transactions.
- Designed RESTful APIs with request validation and DTO mapping (via MapStruct), enabling clean API responses, proper error handling, and robust Postman-tested endpoints.

Experience

Software Engineer Fellow | Springboard | Remote

June/2024 – May/2025

- Built an end-to-end full-stack community platform (Next.js, React, PostgreSQL) with secure authentication, dashboards, search/filter, interactive map, and caching, improving resource submission. | LiveLink
- Developed a secure RESTful API for a dog adoption platform (Node.js, Express, MongoDB) with token auth, 7 CRUD routes, MVC design, and tested with Mocha/Chai, ensured scalable and data management.
- Engineered a Space Travel Planner using React Router and Hooks with dynamic forms, client-side routing, React Testing Library delivering a seamless UI and fully tested user experience.

Tech Operations Associate | Krishnamurthy Tandon Foundation | New York, NY

Nov/2021 – Oct/2022

- Enhanced website uptime 20% via JavaScript and Netlify optimizations improving reliability.
- Delivered cross functional projects by coordinating with vendor teams and integrating technical solutions, ensuring timely completion and effective communication.

Data Engineer Intern | Real Factors (Acquired by 7Park Data) | New York, NY

June/2019 – Aug/2019

- Ensured 100% accurate map rendering by parsing geospatial data with SQL in BigQuery preacquisition.
- Improved dashboard performance by optimizing large dataset queries using views, and stored procedures.
- Enhanced dashboard reporting with charts and SQL window functions, improving analytics & data insights.

Machine Learning Researcher (with Prof. Jia Xu) | Hunter College | New York, NY

Sep/2018 – May/2019

- Optimized Codenn ML model performance by tuning hyperparameters using PyTorch and CUDA.
- Presented research findings to peers and professors, guiding model refinements and improving feasibility.

Education

Bachelor of Arts, Computer Science | Hunter College, New York, NY
CUNY2X TTP Residency | Hunter College, New York, NY

2020
2019
