EDUCATION

Hunter College

Bachelor's in Computer Science

New York, NY

TECHNICAL SKILLS

Languages: Typescript, Javascript, Python

Frontend: React, Next.js, HTML/CSS, Tailwind CSS, Material UI

Backend: Node.js, Express.js, GraphQL, Next.js API routes, SQL, Flask, REST APIs, Prisma ORM

Databases: MongoDB, PostgreSQL

Developer Tools: : Git, Docker, GCP BigQuery, AWS, Figma, GitHub Actions, Jest, Chai, React Testing Library

EXPERIENCE

Software Engineering Student

June 2024 - May 2025

Springboard

Online

- Completed 700+ hour focused on full-stack development with JavaScript, React, Node.js, Express and PostgreSQL
- Worked closely with industry mentors to improve code quality, system design thinking, and technical communication through regular code reviews and project feedback.
- Built and deployed multiple full-stack projects, including capstone apps with authentication, CRUD operations, and RESTful APIs.
- Implemented unit/integration tests with Jest, Chai, Mocha and React Testing Library to ensure reliability

Tech Operations Associate

Nov 2021 – Oct 2022

Soul Chants Music

New York, NY

- Implemented website updates by modifying site code and managing deployments on Netlify, improving reliability
- Streamlined vendor operations by managing contracts and implementing reusable templates via SignNow, reducing administrative bottlenecks and improving turnaround times
- Led end-to-end project planning using Asana and Basecamp, aligning stakeholder goals and deadlines, resulting in successful on-time delivery of multiple cross-department initiatives

Data Engineer Intern

June 2019 – Dec 2019

Real Factors (acquired by 7Park Data)

Queens, NY

- Resolved geospatial rendering issues using BigQuery SQL and WKT parsing ahead of a key merger
- Built data dashboards integrating internal data catalogs with Superset to improve analytics access
- Optimized large demographic datasets for visualization and reporting with efficient SQL views, stored procedures, user defined functions for GCP BigQuery

Machine Learning Research Assistant

May 2018 – June 2019

Hunter College

New York, NY

- Researched and analyzed cutting-edge ML/NLP papers via Paperswithcode, arxiv.org to identify and apply strategies for enhancing *machine translation* model performance
- Fine-tuned and experimented with pre-trained models using TensorFlow, PyTorch and remote cloud GPU's
- Presented research insights biweekly to support team discussions and project direction

TECHNICAL PROJECTS

Himalayan Connect NYC | *Full-Stack Resource Hub*

Feb 2025 – Present

- Built full-stack app with Next.js, PostgreSQL, Prisma, and JWT auth, featuring search, filters, favorites, and user/admin dashboards
- Integrated Cloudinary for image uploads with URL storage and in-app display
- Implemented error handling, metadata management, and UI performance optimization
- Designed responsive UI with Tailwind, Material UI, and integrated Google Maps API for location-based services
- Wrote unit and integration tests with Jest and React Testing Library to ensure reliability
- GitHub: github.com/HimalayanConnectNYC
