Education

COOP Careers

New York, NY

Data Analytics Fellow

Expected June 2026

- Engaging in a 16-week fellowship program, acquiring expertise in data cleaning, transformation, analysis, and visualization using SQL, Python, and Tableau, alongside continuous professional development
- 200 hours of instruction time with a hands-on mastery of data tools, communication training, networking, and client work with actual companies
- A highly selective program that admits underemployed college graduates from under resourced & marginalized communities

Hunter College, CUNY

New York, NY

Bachelor of Arts in Computer Science

Jan 2020

- Relevant Coursework: Practical Web Development, Database Management, Supervised Research, Applied Statistics

Technical Skills & Certifications

- **Certifications:** Python for Everybody (Coursera), AWS Academy Cloud Foundations, Big Data Analytics with Hadoop & Spark
- **Trainings:** CUNY2X TTP Residency at Hunter College, CodePath Cybersecurity course
- **Programming Languages:** JavaScript, TypeScript, Python, Java, SQL, HTML, CSS, Shell Scripts
- **Frameworks & Libraries:** React, Redux, Next.js, Node.js, Express, Docker, Kubernetes, TanStack Start (exploring)
- **Databases & Cloud:** PostgreSQL, MongoDB, GCP BigQuery, AWS (Solution Architect in progress)
- **APIs & Tools:** REST, GraphQL, Postman, Vim, Git, GitHub Actions (CI/CD)
- **Leadership & Community Service:** Accountant at Lo-Nyamship Association USA

Projects

Himalayan Connect NYC, Community Resource Platform(TypeScript, Next.js, Postgres, Vercel), Github | Live June 2025

- Engineered a full-stack platform by translating Figma designs into a functional application, integrating **interactive Google Maps, Redis caching, and Cloudinary** for seamless resource discovery.
- Deployed a production-ready solution with comprehensive documentation, optimizing scalability and security through Vercel Speed Insights, firewalls, and rate limiting.

Work Experience

Springboard

New York, NY

Software Engineering Fellow

June 2024 – May 2025

- Completed 700+ hours of hands-on coursework with 1:1 expert mentorship, applying JavaScript and TypeScript to design, test, and implement scalable full-stack systems using MERN stack best practices.
- Developed and deployed full-stack projects, including a Dog Adoption API, Space Travel Planner, and Pokedex game, by incorporating rigorous testing frameworks and code reviews to ensure production-ready quality
- Developed secure RESTful API for a dog adoption platform (Node.js, Express, MongoDB) with token authentication, 7 CRUD routes, MVC design, and Mocha/Chai tests, ensuring scalable data management.
- Engineered a Space Travel Planner app using React, Hooks and React Router with dynamic forms, client-side routing, React Testing Library delivering a seamless and fully tested user interface.

Krishnamurthy Tandon Foundation

New York, NY

Tech Operation Associate

Nov 2021 – Oct 2022

- Boosted website uptime by 20% through JavaScript and Netlify optimizations improving reliability.
- Led and managed cross-functional projects by coordinating vendor teams and executing tasks using a custom Excel tracker and Basecamp, ensuring timely completion and clear communication.
- Led digital initiatives including social media management, ad campaigns, website updates, and technical setup

for events and studio operations, showing problem-solving, adaptability, and hands-on technical skills.

Real Factors (acquired by 7Park Data)

Astoria, NY

Data Engineer Intern

June 2019 – Aug 2019

- Resolved map display errors by correctly parsing geospatial data using SQL ensuring accurate visualization before key acquisition deadline.
- Integrated and transformed multi-source data using SQL and GeoJSON to create reliable tables and views for business intelligence and analytics.
- Developed interactive dashboard providing actionable insights through charts, reports, while documenting processes for future team continuity.

Statistical Machine Learning Group at Hunter College

New York, NY

Machine Learning Student Researcher (with Prof. Jia Xu)

Sep 2018 – Apr 2019

- Trained and optimized a Neural Attention Model (Codenn) using PyTorch leveraging CUDA and Linux shell scripting to enhance performance and efficiency.
- Researched and analyzed state-of-the-art Natural Language Processing(NLP) models for machine translation presenting findings to peers and professors to guide experimental design and implementation strategies.
- Documented insights and experimental outcomes, improving understanding of deep learning frameworks and contributing to group knowledge.
