EXPERIENCE

Software Engineering Fellow

June 2024 - May 2025

Springboard

Remote

- Completed 700+ hours of full-stack training with 1:1 mentorship; delivered full-stack app using Next.js, React, TypeScript, and Prisma ORM, managing end-to-end development from database design to deployment | [LiveLink](#)
- Built a secure Dog Adoption API with token-based auth, filtering, pagination and error handling using Node.js, Express and MongoDB(NoSQL); wrote Mocha/Chai tests validating core features to improve reliability
- Developed and tested Space Travel Planner with dynamic forms and client-side routing using React Router, Hooks, and React Testing Library ensuring seamless UI and robust test coverage
- Created a Pokedex game with dynamic components and a custom scoring using React and responsive CSS modules

Tech Operations Associate

Nov 2021 – Oct 2022

Soul Chants Music

New York, NY

- Led technical updates for CEO's personal website using Javascript and managed Netlify deployment
- Led project planning and delivery using Excel trackers, Asana, and Basecamp aligning teams to meet deadlines
- Automated asset tracking with Google Sheets and Apps Script, reducing manual workload by 30%

Data Engineer Intern

June 2019 – Aug 2019

Real Factors (acquired by 7Park Data)

Queens, NY

- Resolved BigQuery SQL polygon data issues, ensuring 100% map accuracy and timely acquisition reporting
- Built Superset dashboards and technical documentation for 50K+ datasets, streamlining analytics access
- Reduced query latency optimizing BigQuery SQL with views, stored procedures, and user-defined functions

Machine Learning Research Assistant

May 2018 – June 2019

Hunter College

New York, NY

- Presented state-of-the-art machine translation research papers from arxiv, Papers with Code to assess feasibility
- Reproduced Codenn model with PyTorch/TensorFlow on cloud GPUs via SSH for training and testing
- Tuned hyperparameters, benchmarked datasets, and strengthened understanding of NLP model evaluation

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: ReactJS/Redux, Next.js, HTML, CSS, Tailwind CSS, Material UI

Backend: Node.js/Express, API Design (REST/GraphQL), BigQuery, MySQL, PostgreSQL, MongoDB

Tools/Testing: Git, Vim, Vite, AWS, GCP, Docker, Figma, CI/CD, Redis, Jest

Concepts: Agile, Scrum, TDD, Microservices, JWT/OAuth, Database & System Design, LLM Integration, GenAI

PROJECTS

Community Platform App: Enabled community members to access key resources; implemented JWT auth, search & filtering, Google Maps API for location-based access, and Cloudinary improving usability & performance | [LiveLink](#)

Text Completion AI app: Built a real-time AI text completion by integrating OpenAI's API with Next.js and Vercel AI SDK using streaming responses and dynamic input handling for an interactive experience | [Repo](#)

Social Media Clone: Developed a Next.js full-stack MySpace clone enabling user auth, following, and dynamic content management using Next.js, TypeScript, Prisma, PostgreSQL, and Auth.js enhancing interactivity and UX | [Repo](#)

Ecommerce Java API: Built a RESTful backend with Spring Boot and MySQL using DTOs and dynamic routing to manage product data, gaining experience in clean, modular Java server architecture | [Repo](#)

EDUCATION

Hunter College

New York, NY

Bachelor's in Computer Science

2020

Certifications: Python for Everybody (UMich, 07/2021); CodePath Cybersecurity (12/2020); CUNY2X-TTP (05/2019)

LEADERSHIP & INTERESTS

Leadership: Organized Internship and College Info sessions reaching 20+ students & families in the community

Interests: Community Service, Economics, Documentaries, Reading, Blockchain, Emerging Technologies, AI/ML
