

TOPGYAL GURUNG

Queens, NY | (347) 935-9179 | topgyal.gurung@gmail.com | LinkedIn: Topgyalgurung | GitHub: Topgyalgurung | topgyalgurung.me

SUMMARY

Full Stack Software Engineer with a Bachelor's in Computer Science, specializing in the MERN Stack, Next.js, JavaScript, Typescript, Python, and PostgreSQL database. Passionate problem-solver dedicated to building scalable, user-focused applications. Committed to continuous learning, driven by a growth mindset and accountability.

SKILLS

Programming: JavaScript, Typescript, Python, C++, Java, SQL

Web Technologies: React, Next.js, HTML, CSS, Tailwind, Express, Node.js, Flask, PostgreSQL, Prisma ORM, MongoDB

Tools & Software: Git Version Control, Figma, REST APIs, GraphQL, Google Cloud Platform (BigQuery), Unit Testing

PROJECTS

Himalayan Connect NYC | Next.js, React, Typescript, *PostgreSQL(Prisma ORM)*, *Google Maps API*, *Figma UI Design* Feb 2025

- Full-stack web application designed to connect the Himalayan community in NYC with essential resources, including nonprofits, immigration services, and local businesses.
- Features advanced search, filtering, user-submitted resources, and an admin review system for managing new and suggested edit

WORK EXPERIENCE

Soul Chants Music

New York, NY

Technology Operations Associate

Nov 2021 - Oct 2022

- Set up and maintained websites through GoDaddy and Netlify, while managing third-party contracts and vendor partnerships to promote operational efficiency
- Oversaw comprehensive project timelines and task management using platforms such as Asana and Basecamp, improving collaboration among teams and ensuring timely execution of critical initiatives
- Negotiated contracts, established project scopes, and facilitated communication with stakeholders, ensuring legal adherence and successful project results

Real Factors

Astoria, New York

Data Engineer Intern

Jun 2019 - Aug 2019

- Resolved triangle rendering issue in frontend report map chart by accurately parsing Well-Known Text into strings using BigQuery SQL ensuring precise geospatial visualizations
- Designed and created interactive dashboards and charts with company's custom-built data catalog integrated with Apache Superset, leveraging data transformations and aggregations to enhance visualization, filtering, and reporting capabilities, enabling customers to derive key insights and predictions
- Developed SQL queries in GCP BigQuery to process large-scale public, private and propriety demographic, income and location datasets, creating optimized views and tables for seamless data integration in report maps

Hunter College - Professor Dr. Jia Xu

New York, NY

Student Machine Learning Researcher

May 2018 - Jun 2019

- Analyzed cutting-edge research papers using Natural Language Processing (NLP) and deep learning
- Trained and optimized deep learning models for machine translation using TensorFlow, PyTorch, Linux shell scripting
- Utilized CUNY's HPC cluster and Nvidia CUDA to improve model performance for NLP tasks

EDUCATION

Software Engineering Career Track

Springboard

Jun 2024 - Apr 2025(Expected)

Completing 800+ hours of hands-on coursework, including four in-depth portfolio projects using the MERN Stack, Javascript, TypeScript and Next.js. Developing expertise in Agile methodologies, databases, data structures, and algorithms

Bachelor of Arts in Computer Science

New York, NY

CUNY Hunter College

2020
