Software Engineering Fellow

June 2024 – May 2025

Springboard

Remote

- Completed 700+ hours of full-stack web dev training with 1:1 mentor guidance, building projects like:
- Shipped a full-stack app with Next.js and Prisma from database design to deployment | [Live App](#)
- Space Travel Planner — Track and manage space missions and vehicle details in a clean UI

Tools: React, React Router, Hooks, React Testing Library

Results: Built modular UI with dynamic forms, client-side routing, and component testing for reliability

- Pokédex + Card Game — Display Pokémon data and simulate card battles using React

Tools: React, JSX, CSS Modules

Results: Created dynamic components, a custom scoring function, and responsive UI

- Dog Adoption API — Developed RESTful backend API for managing dog adoption workflows

Tools: Node.js, Express, MongoDB Atlas, Mongoose, JWT, bcrypt, dotenv, CORS, Mocha, Chai

Results: Delivered MVC backend with token auth, filtering, pagination, error handling, and full test coverage

Tech Operations Associate

Nov 2021 – Oct 2022

Soul Chants Music

New York, NY

- Managed site updates and production deployments via Netlify, improving reliability
- Streamlined project coordination with a custom Excel system and Asana/Basecamp, accelerating video delivery
- Automated asset and metadata tracking using Google Sheets and Apps Script reducing manual work

Data Engineer Intern

June 2019 – Aug 2019

Real Factors (acquired by 7Park Data)

Queens, NY

- Fixed map display issues by debugging polygon data in BigQuery, improving accuracy before acquisition
- Built internal reports, dashboards and documentation using Superset for faster analytics access
- Minimized query latency by optimizing BigQuery SQL with views, stored procedures, and user-defined functions

Machine Learning Research Assistant

May 2018 – Apr 2019

Hunter College

New York, NY

- Presented state-of-the-art machine translation research papers to assess feasibility and guide project direction
- Reproduced Codenn using PyTorch/TensorFlow on cloud CUDA GPUs enabling scalable training and testing
- Tuned hyperparameters, benchmarked datasets to optimize model performance in NLP pipelines

TECHNICAL PROJECT

Himalayan Connect NYC | *Full-Stack Resource Hub*

Feb 2025 – Present

- Built full-stack app with Next.js, React, TypeScript, and Prisma ORM, owning end-to-end dev lifecycle
- Implemented secure JWT auth, search/filter features, and Google Maps API for location-based resource access
- Integrated Cloudinary for image handling | [Live App](#)

Java Spring Boot eCommerce App | *Backend-Focused Web App*

July 2025 – Present

- Built scalable REST APIs for products, orders, and payments using Spring Boot and Maven
- Implemented clean architecture with modular service layers, exception handling, and dependency injection
- Leveraged Spring annotations and bean management to enhance modularity and maintainability | [Repo](#)
