New York, NY, 11370 | 347-935-9179 | topgyal.gurung@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full Stack Software Engineer with a CS degree and 3+ years of experience building scalable, data-driven applications using React, Next.js, TypeScript, Python, BigQuery and the MERN stack. Experienced in deploying end-to-end projects, data engineering, and cross-functional collaboration, with a passion for creating clean, maintainable systems

EDUCATION

Bachelor of Arts in Computer Science - Hunter College, City University of New York

2020

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer Fellow | Springboard, Remote

June 2024 – May 2025

- Completed 700+ hours of hands-on coursework, with 1:1 expert mentor oversight enabling efficient design and implementation of scalable systems with best practices
- Built and deployed full-stack projects including a Dog Adoption API, Space Travel Planner, and Pokedex game by implementing MERN stack features and testing frameworks, resulting in fully functional, production-ready applications

Tech Operations Associate | Krishnamurthy Tandon Foundation, New York, NY

Nov 2021 - Oct 2022

- Improved website uptime by 20% through JavaScript and Netlify optimizations enhancing site reliability
- Delivered 3+ cross-functional projects by coordinating 5+ team members and integrating technical solutions

Data Engineer Intern | Real Factors (acquired by 7Park Data), Queens, NY

June 2019 - Aug 2019

- Ensured 100% accurate frontend map rendering by parsing geospatial data with SQL in BigQuery ahead of acquisition
- Improved dashboard performance by optimizing large dataset queries using views, stored procedures, CTEs, and UDFs
- Enhanced dashboards and reporting by building charts and using SQL window functions providing better analytics

Machine Learning Student Researcher | Hunter College, New York, NY

Sep 2018 - May 2019

- Tuned Codenn ML model with hyperparameter optimization in PyTorch/CUDA, improving accuracy and efficiency
- Presented NLP research papers to peers and professor by attending talks and reading books to discuss feasibility

TECHNICAL PROJECTS

Himalayan Connect NYC [GitHub](#) | [Live](#) Next.js, React, Prisma ORM, Postgres, Vercel

Jan 2025 - Pres

- Built an end-to-end full-stack application from Figma UI design and database modeling to production deployment
- Implemented Redis caching, rate limiting, Google Maps API, and Cloudinary to improving system performance
- Enhanced UX with dashboards, search/ filter, authentication, resource submissions, and an interactive map

E-commerce Backend API [GitHub](#) Java, Spring Boot, MySQL

July 2025

- Implemented a RESTful backend API using DTOs and dynamic routing to ensure scalability
- Applied clean, modular Java microservice architecture to improve maintainability and efficiency

Finance Dashboard [GitHub](#) | [Live](#) Next.js, Auth.js, Tailwind, Zod

July 2025

- Built a Next.js finance dashboard with search, pagination, and validated forms, improving data accessibility
- Integrated a secure authentication and robust error handling, resulting in zero reported user issues during testing

SKILLS & CERTIFICATIONS

Programming: JavaScript, TypeScript, Python, Java, SQL, Node.js, HTML, CSS, REST API, GraphQL

Libraries & Frameworks: React, Next.js, Redux, Express, Spring Boot, Tailwind, Docker, Kubernetes

Databases & Cloud: PostgreSQL, MongoDB, Redis, GCP BigQuery, AWS, Jest, GitHub Actions (CI/CD)

Certifications: Python for Everybody (2021), CodePath Cybersecurity (2020), AWS Academy Cloud Foundations (2020)
