

Topgyal Gurung - Full Stack Software Engineer

347-935-9179 | topgyal.gurung@gmail.com | [linkedin.com/in/topgyalgurung](https://www.linkedin.com/in/topgyalgurung) | github.com/topgyalgurung

EDUCATION

Hunter College

Bachelor's in Computer Science

New York, NY

EXPERIENCE

Software Engineering Student

June 2024 – May 2025

Springboard

Remote

- Built and deployed a scalable full-stack app using React/Next.js, TypeScript, and PostgreSQL, simulating enterprise-grade backend functionality (bit.ly/4kHzV5p)
- Designed and integrated custom JWT-based authentication, role-based access control, search, and filtering features
- Designed responsive UI with Tailwind, Material UI, and integrated Google Maps API for location-based services
- Wrote unit and integration tests with Jest and React Testing Library to ensure frontend and backend reliability
- Debugged UI and backend performance issues using Chrome DevTools, server logs, and Postman
- Applied Agile practices to rapidly prototype, iterate, and deliver user-facing features

Tech Operations Associate

Nov 2021 – Oct 2022

Soul Chants Music

New York, NY

- Implemented website updates per CEO direction by modifying site code and managing deployments on Netlify, improving load times and overall reliability
- Streamlined vendor operations by managing contracts and implementing reusable templates via SignNow, reducing administrative bottlenecks and improving turnaround times
- Led end-to-end project planning using Asana and Basecamp, aligning stakeholder goals and deadlines, resulting in successful on-time delivery of multiple cross-department initiatives
- Managed CEO's complex, multi-domain schedule across education, music, and business, ensuring smooth execution of priorities with attention to discretion and detail

Cybersecurity Curriculum Consultant

Nov 2020 – Feb 2021

Research Foundation of CUNY

New York, NY

- Curated a hands-on cybersecurity curriculum by combining CloudLab exercises, network security labs, and CTF challenges
- Completed 13 weeks CodePath cybersecurity course through real world labs and Capture the Flag challenges

Software Developer Intern

Mar 2020 - Aug 2020

Dextro Software Systems

Princeton, NJ

- Designed and optimized T-SQL queries and stored procedures to support financial reporting, risk analysis, and regulatory compliance
- Developed robust SSIS ETL pipelines to integrate large volumes of transactional and market data from multiple financial systems into a centralized data warehouse
- Built and maintained interactive dashboards in SSRS and Power BI for real-time insights into revenue performance, portfolio health, and key financial KPIs

Data Engineer Intern

June 2019 – Aug 2019

Real Factors (acquired by 7Park Data)

Queens, NY

- Resolved geospatial rendering issues using BigQuery SQL and WKT parsing ahead of a key merger
- Built interactive data dashboards in Apache Superset by integrating internal data catalogs, enabling CEOs and partners to make faster, data-driven business decisions
- Optimized large demographic datasets for visualization and reporting; wrote efficient SQL views, stored procedures, user defined and aggregate functions for GCP BigQuery

Machine Learning Research Assistant

May 2018 – June 2019

Hunter College

New York, NY

- Collaborated with professor and senior research fellow to evaluate implementation feasibility of state-of-the-art machine translation models (e.g., CODE-NN)

- Reproduced deep learning models in PyTorch and TensorFlow using remote cloud GPUs (CUNY HPCC), leveraging CUDA for performance optimization
- Conducted model training, hyperparameter tuning, and benchmarking on real-world NLP datasets to validate accuracy and efficiency
- Gained hands-on experience with remote development workflows (SSH), GPU computing, and NLP model evaluation in a research-engineering environment

TRAININGS AND CERTIFICATIONS

Python for Everybody Specialization, University of Michigan May 2021 – July 2021

- Learned to program and analyze data with python. Developed programs to clean, analyze, and visualize data

CodePath Cybersecurity by CodePath Feb 2021 - Apr 2021

- Gained practical experience in network security, ethical hacking, threat analysis, and secure coding practices
- Identified and exploited common vulnerabilities such as SQL injection, XSS, CSRF, and session hijacking through guided labs and Capture the Flag (CTF) challenges

CUNY2X TTP x Full Stack Academy May 2020 - June 2019

- Selected for a 6-week, full-time (40 hrs/week) Full Stack Software Development program led by Fullstack Academy, with a focus on Agile/Scrum methodologies
- Applied JavaScript concepts, DOM manipulation, REST API with hands on projects
- Built with teams full stack web application with React, Redux in frontend and Node, Express and Sequelize ORM for Postgres in backend and deployed in Heroku

TECHNICAL SKILLS

Languages: Typescript, Javascript, Python

Frontend: React, Next.js, HTML/CSS, Tailwind CSS, Material UI

Backend: Node.js, Express.js, GraphQL, Next.js API routes, SQL, Flask, REST APIs, Prisma ORM

Databases: MongoDB, PostgreSQL

Developer Tools: Git, Docker, Vercel, GCP BigQuery, AWS, Figma, CI/CD

Testing: Jest, Chai, React Testing Library, TDD

TECHNICAL PROJECTS

Himalayan Connect NYC | *Full-Stack Resource Hub* Feb 2025 – Present

- Built a robust resource-sharing platform from scratch using Next.js, PostgreSQL, Prisma ORM, and JWT authentication (github.com/HimalayanConnectNYC)
- Focused on scalable backend architecture and personalized user access for community-based data
- Emulated real-world feature deployment across environments using Vercel, Git workflows, and environment variables
- Implemented error handling, metadata management, and UI performance optimization
