

TOPGYAL GURUNG

Queens, NY | (347) 935-9179 | topgyal.gurung@gmail.com | LinkedIn: Topgyalgurung | GitHub: Topgyalgurung | topgyalgurung.me

SUMMARY

Full Stack Software Engineer with a Bachelor's in Computer Science and a strong focus on the MERN Stack, Next.js, JavaScript, Typescript, Python, and PostgreSQL. Passionate about solving complex problems and developing scalable, user-centric applications. Known for a strong growth mindset, accountability, and a commitment to continuous learning and innovation

SKILLS

Programming: JavaScript, Typescript, Python, SQL

Frontend: React, Next.js, HTML, CSS, Tailwind

Backend: Node, Express, GraphQL

Databases: MongoDB, PostgreSQL, Prisma ORM, SQL Server

Tools: Git, Google Cloud(BigQuery), Figma, Chai, Jest, Cypress, React Testing Library, Test Driven Development(TDD)

PROJECTS

Himalayan Connect NYC | Next.js, React, Typescript, *Prisma ORM*, *Google Maps API* | GitHub: [HimalayanConnectNYC](#) **Feb 2025**

- Developed a comprehensive web application serving as a one-stop resource hub for the Himalayan community in NYC, featuring legal assistance, nonprofit services, and job opportunities
- Implemented advanced search, filtering, user-submitted listings, and an admin review system to ensure accuracy and community-driven content

WORK EXPERIENCE

Soul Chants Music

New York, NY

Technology Operations Associate

Nov 2021 - Oct 2022

- Set up and maintained websites via GoDaddy and Netlify optimizing performance and seamless functionality
- Managed third-party vendor relationships and contracts to streamline operations and enhance service delivery
- Led end-to-end project planning with Asana and Basecamp, ensuring cross-functional alignment and on-time delivery
- Negotiated contracts, defined scopes, and coordinated with stakeholders to ensure project success and compliance.

Real Factors

Astoria, New York

Data Engineer Intern

Jun 2019 - Aug 2019

- Resolved a triangle rendering issue in frontend report map chart by accurately parsing Well-Known Text(WKT) into strings using BigQuery SQL, ensuring precise and reliable geospatial visualizations
- Developed interactive dashboards and charts with company's custom-built data catalog, integrated with Apache Superset
- Applied data transformations and aggregations to enhance visualization, filtering, and reporting functionality, enabling customers to uncover key insights and make data-driven predictions
- Built optimized SQL queries to create tables and efficient views in GCP BigQuery for large-scale demographic, income, and location datasets for seamless integration in report maps

Hunter College - Professsor Dr. Jia Xu

New York, NY

Student Machine Learning Researcher

May 2018 - Jun 2019

- Researched and analyzed state-of-the-art ML/NLP papers to explore strategies for improving model performance
- Fine-tuned and experimented with pre-trained models using TensorFlow and PyTorch
- Conducted model training and evaluation on CUNY's HPC cluster and Nvidia CUDA focusing on improving SOTA benchmarks

EDUCATION

Springboard - Software Engineering Career Track

Expected Completion: Apr 2025

- Completing 800+ hours of full-stack development training with MERN, Javascript, TypeScript and Next.js building four in-depth portfolio projects and mastering Agile, databases, data structures, and algorithms

Bachelor of Arts in Computer Science

New York, NY

CUNY Hunter College

Jan 2020
