Software Engineer

Bachelor-level educated with full-stack and startup experience, and strong problem solving skills. Competed in school math contests; consistently ranked first in class. Skilled in React, Next.js, JavaScript, TypeScript, Python, and full SDLC.

Passionate about high-level system design, and writing clean, maintainable code; pursuing AWS Developer Associate

SKILLS & CERTIFICATIONS

Programming: JavaScript, TypeScript, Python, Java, C++, SQL, NoSQL, Node.js, HTML5, CSS, XML, JSON

Libraries & Frameworks: React, Next.js, Redux, Express, Spring Boot, Tailwind CSS, Docker, Kubernetes, GraphQL

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Redis, AWS, GCP BigQuery, Jest, GitHub Actions (CI/CD)

Certifications: Python for Everybody (2021), CodePath Intermediate Cybersecurity (2020), AWS Academy Foundations (2020)

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer Fellow - Springboard | Remote

June 2024 – May 2025

- Completed 700+ hours of mentor led full-stack training gaining expertise in MERN stack and core CS concepts
- Built and deployed multiple projects including a capstone, a Dog Adoption API (auth, filtering, pagination, Mocha), Space Travel Planner (React Router, Hooks, testing), and a Pokedex game (reusable components, responsive UI)

Tech Operations Associate - Krishnamurthy Tandon Foundation | New York, NY

Nov 2021 - Oct 2022

- Maintained and optimized website improving uptime by 20% and responsiveness using JavaScript and Netlify
- Led project planning and delivery, aligning teams to meet deadlines using Excel, Asana, and Basecamp
- Ensured legal compliance and successful outcomes by negotiated contracts and defining clear project scopes

Data Engineer Intern - Real Factors (acquired by 7Park Data) | Queens, NY

June 2019 - Aug 2019

- Ensured 100% accurate frontend map rendering pre-acquisition by parsing geospatial data with BigQuery SQL
- Optimized 50k+ datasets by designing SQL tables with views, stored procedures, CTEs, and UDFs
- Enhanced dashboards and reporting by building charts and leveraging SQL window functions for filtering and analytics

Machine Learning Student Researcher - Hunter College | New York, NY

Sep 2018 - May 2019

- Trained deep learning model (Codenn) for machine translation using TensorFlow, PyTorch, CUDA, and Linux shell
- Enhanced model performance by tuning hyperparameters and benchmarked datasets

PROJECTS

Himalayan Connect NYC

Stack: Next.js, React, Prisma, Postgres, Vercel

[GitHub](#) | [Live](#)

- Built an end-to-end full-stack app from Figma UI design and database schema modeling to deployment
- Implemented Zod input validation, Redis caching, rate limiting, Day.js, Google Maps API, and Cloudinary for image
- Added user authentication, search/ filter, user & admin dashboards, user submissions, and an interactive map

E-commerce Backend API

Stack: Java, Spring Boot, MySQL

[GitHub](#)

- Implemented a RESTful backend API with Spring Boot and MySQL using DTOs and dynamic routing
- Gained experience in clean, modular Java microservice architecture

CunyFirst2.0

Stack: PERN, Sequelize ORM, PostgreSQL, JavaScript, Express

[GitHub](#)

- Developed a scheduling tool as part of 4-person full-stack Agile Scrum team, focusing on backend development
- Designed Sequelize database models, Express API routes, search functionality, and authentication

AI Text Generation Chatbot

Stack: Open AI API, Next.js, Vercel AI SDK

[GitHub](#)

- Built a real-time chatbot implementing streaming responses and exploring RAG, tokens and context handling

EDUCATION

Bachelor's in Computer Science, Hunter College
