EDUCATION

Springboard

Software Engineering Career Track

Online

June 2024 - May 2025

- Completed 800+ hours of full-stack web development training with industry mentorship
- Mastered MERN stack, Next.js, TypeScript, REST, GraphQL, and core CS concepts

Hunter College

Bachelor's in Computer Science

New York, NY

TECHNICAL SKILLS

Languages: Javascript, Typescript, Python, SQL, HTML/CSS

Frontend: Next.js, React, Tailwind, Material-UI

Backend: Node.js, Express.js, GraphQL, REST

Databases: MongoDB, PostgreSQL, Prisma ORM

Developer Tools: Git, Vim, Bash, Docker, Postman, GCP BigQuery, Figma, Chai, Jest, React Testing Library, TDD

EXPERIENCE

Software Engineering Student

Springboard

June 2024 - May 2025

Online

- Built and deployed a full-stack React/Next.js app with TypeScript, Prisma, and PostgreSQL on Vercel to centralize NYC Himalayan community resources
- Implemented custom JWT authentication, search and filter functionality, and user/admin dashboard features
- Designed responsive UI with Tailwind CSS, Material UI, and Google Maps API for location-based browsing
- Built four comprehensive projects using React, Node.js, Express, and MongoDB, with additional tools including GraphQL, Redux, React Router, and testing libraries—focusing on intermediate JavaScript
- Capstone: HimalayanConnectNYC

Tech Operations Associate

Soul Chants Music

Nov 2021 – Oct 2022

New York, NY

- Set up and maintained websites using GoDaddy and Netlify, ensuring optimal performance and reliability
- Managed vendor contracts to streamline operations and improve service quality
- Led project planning in Asana and Basecamp, aligning teams and meeting deadlines
- Negotiated contracts and defined scopes while coordinating with stakeholders to ensure successful, compliant project delivery

Data Engineer Intern

Real Factors (acquired by 7Park Data)

June 2019 – Dec 2019

Queens, NY

- Resolved geospatial rendering issues in Superset maps by parsing WKT with BigQuery SQL, ensuring accurate visuals ahead of a key merger
- Built dashboards by integrating a custom data catalog with Superset, improving data access for internal teams
- Transformed large datasets to improve filtering, reporting, and visualization in customer tools, enabling better data-driven decisions
- Optimized SQL queries and created efficient views in GCP BigQuery for high-volume demographic, income, and location datasets, streamlining performance and seamless integration with reporting tools

Machine Learning Research Assistant

Hunter College

May 2018 – June 2019

New York, NY

- Researched ML/NLP papers and applied insights to improve machine translation model performance
- Fine-tuned pre-trained models using TensorFlow and PyTorch for targeted experiments
- Trained and evaluated models on CUNY's HPC cluster with CUDA, aiming to exceed SOTA benchmarks
