

Topgyal Gurung - Software Engineer

topgyal.gurung@gmail.com | linkedin.com/in/topgyalgurung | github.com/topgyalgurung | topgyalgurung.me

EXPERIENCE

Software Engineering Fellow

June 2024 - May 2025

Springboard

Remote

- Completed 700+ hours of full-stack training with 1:1 mentorship; delivered full-stack app using Next.js, React, TypeScript, and Prisma ORM, managing end-to-end development from database design to deployment | [LiveLink](#)
- Built a secure Dog Adoption API with token-based auth, filtering, pagination and error handling using Node.js, Express and MongoDB(NoSQL); wrote Mocha/Chai test
- Developed and tested Space Travel Planner with dynamic forms and client-side routing using React Router, Hooks, and React Testing Library ensuring seamless UI and robust test coverage
- Created a Pokedex game with dynamic components and a custom scoring using React and responsive CSS modules

Tech Operations Associate

Nov 2021 – Oct 2022

Soul Chants Music

New York, NY

- Led project planning and delivery using Excel trackers, Asana, and Basecamp aligning teams to meet deadlines
- Automated asset tracking with Google Sheets and Apps Script, reducing manual workload and increasing efficiency
- Led technical updates for CEO's personal website and managed Netlify deployment, increasing reliability

Data Engineer Intern

June 2019 – Aug 2019

Real Factors (acquired by 7Park Data)

Queens, NY

- Debugged and fixed map display issues by resolving polygon data in BigQuery, improving accuracy pre-acquisition
- Created internal reports, dashboards and technical documentation using Superset & Box for faster analytics access
- Reduced query latency by optimizing BigQuery SQL with views, stored procedures, and user-defined functions

Machine Learning Research Assistant

May 2018 – June 2019

Hunter College

New York, NY

- Presented state-of-the-art machine translation research papers to assess feasibility
- Reproduced Codenn model with PyTorch/TensorFlow on cloud GPUs via SSH for training and testing
- Tuned hyperparameters, benchmarked datasets, and strengthened understanding of NLP model evaluation

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, CSS, HTML

Frontend: ReactJS/Redux, Next.js, Tailwind CSS, Material UI

Backend: Node.js/Express, RESTful API, JSON, GraphQL, BigQuery, PostgreSQL, MongoDB

Tools/Testing: Git, Vim, Vite, AWS, GCP, Docker, Figma, CI/CD, Jest

Concepts: Agile, Microservices, Serverless, Unit Testing, TDD, JWT/OAuth, Schema Design, System Design, GenAI

PROJECTS

Himalayan Connect NYC: Implemented secure JWT authentication, search and filtering features, Google Maps API for location-based access, and Cloudinary for dynamic image handling to enhance usability and performance | [LiveLink](#)

Next.js AI app: Built a real-time AI text completion feature by integrating OpenAI's API with Next.js and Vercel AI SDK, implementing streaming responses and dynamic user input handling for an interactive experience | [Repo](#)

MySpace Clone: Developed a Next.js full-stack social media clone with TypeScript, Prisma, and PostgreSQL, featuring Auth.js authentication, dynamic routing, follower system, client-side mutations, and form validation | [Repo](#)

Java Store API: Created a RESTful Java backend application using Spring Boot and MySQL to manage user products, implementing DTOs and dynamic routing for clean API design and maintainable, modular server-side architecture | [Repo](#)

EDUCATION

Hunter College

New York, NY

Bachelor's in Computer Science

LEADERSHIP & ACHIEVEMENTS

Leadership: Organized and led Internship and College Info sessions for high school students in the community

Certifications: Python for Everybody(UMich, 7/21), CodePath Cybersecurity(12/20), CUNY2X-TTP(5/19)
