

Topgyal Gurung - Software Engineer

347-935-9179 | topgyal.gurung@gmail.com | [linkedin.com/in/topgyalgurung](https://www.linkedin.com/in/topgyalgurung) | github.com/topgyalgurung | topgyalgurung.me

EDUCATION

Hunter College

New York, NY

Bachelor's in Computer Science

- Relevant Coursework: Practical Web Development, Algorithm Design, Data Structures, Database Management, Computer Architecture, Operating Systems

TECHNICAL SKILL

Frontend: HTML, CSS, Javascript, Typescript, React/Redux,

Backend: Node.js, Express, Python, Java, Flask, PostgreSQL, MySQL, MongoDB, BigQuery

Frameworks/Libraries: Next.js, Spring Boot, Material UI, Tailwind CSS, Zod, Jest, Cypress, Jest

Others: Agile, Scrum, Git, Vite, REST APIs, Figma, PNPM, Turborepo, CI/CD, Postman, TDD, AWS, GCP, Docker

Familiar: Kubernetes, Redis, AWS(EC2, S3, Lambda, RDS, API Gateway, IAM), GCP BigQuery

AI LLM tools: Copilot, ChatGPT, Cursor for debugging, code acceleration, and iterative prototyping

EXPERIENCE

Software Engineer Freelance

July 2025 – Present

Freelance

New York, NY

- Built a customer invoice dashboard using Next.js, PostgreSQL, and Auth.js to enable authentication, protected routes, full CRUD operations, and accessible form handling with server actions and validation | [Repo](#)
- Developed scalable REST APIs for products, orders, and payments using Java Spring Boot and Maven, enhancing modularity and maintainability through Spring annotations and bean management | [Repo](#)
- Continuously applying best practices and adding features to [HimalayanConnectNYC](#) community platform

Software Engineering Fellow

June 2024 - May 2025

Springboard

Remote

- Completed 700+ hours of full-stack web dev training with 1:1 mentor guidance, building projects like:
- Shipped a full-stack app with Next.js and Prisma from database design to deployment | [Live App](#)
- Space Travel Planner — Track and manage space missions and vehicle details in a clean UI
Tools: React, React Router, Hooks, React Testing Library
Results: Built modular UI with dynamic forms, client-side routing, and component testing for reliability
- Pokedex + Card Game — Display Pokémon data and simulate card battles using React
Tools: React, JSX, CSS Modules
Results: Created dynamic components, a custom scoring function, and responsive UI
- Dog Adoption API — Developed RESTful backend API for managing dog adoption workflows
Tools: Node.js, Express, MongoDB Atlas, Mongoose, JWT, bcrypt, dotenv, CORS, Mocha, Chai
Results: Delivered MVC backend with token auth, filtering, pagination, error handling, and full test coverage

Tech Operations Associate

Nov 2021 – Oct 2022

Soul Chants Music

New York, NY

- Managed site updates and deployments via Netlify, improving reliability
- Led project planning and delivery using Excel trackers, Asana, and Basecamp to align teams and meet deadlines
- Automated asset tracking with Google Sheets and Apps Script, cutting manual effort and boosting efficiency
- Oversaw vendor relationships and contracts to streamline workflows and enhance service quality

Cybersecurity Curriculum Consultant

Sep 2020 – Feb 2021

Hunter College - Research Foundation of CUNY

New York

- Completed CodePath's Cybersecurity course as part of pilot program to integrate into Hunter College curriculum
- Applied offensive and defensive techniques using tools like Burp Suite, Kali Linux, Wireshark, and Metasploit
- Mitigated vulnerabilities such as SQLi, XSS, and CSRF via hands-on labs and capture-the-flag exercises

Software Developer Intern

Apr 2020 - Feb 2021

Dextro Software Systems

Princeton, NJ

- Designed and optimized T-SQL queries and stored procedures to support financial reporting, risk analysis, and regulatory compliance
- Developed robust SSIS ETL pipelines to integrate large volumes of transactional and market data from multiple financial systems into a centralized data warehouse
- Built and maintained interactive dashboards in SSRS and Power BI for real-time insights into revenue performance, portfolio health, and key financial KPIs

Data Engineer Intern

June 2019 – Dec 2019

Real Factors (acquired by 7Park Data)

Queens, NY

- Resolved a triangle rendering issue in frontend report map chart by accurately parsing Well-Known Text(WKT) into strings using BigQuery SQL, ensuring precise and reliable geospatial visualizations
- Developed interactive dashboards and charts with company's custom-built data catalog, integrated with Apache Superset
- Applied data transformations and aggregations to enhance visualization, filtering, and reporting functionality, enabling customers to uncover key insights and make data-driven predictions
- Built optimized SQL queries to create tables and efficient views in GCP BigQuery for large-scale demographic, income, and location datasets for seamless integration in report maps

Machine Learning Research Assistant

May 2018 – June 2019

Hunter College

New York, NY

- Researched and analyzed cutting-edge ML/NLP papers to identify and apply strategies for enhancing *machine translation* model performance
- Fine-tuned and experimented with pre-trained models using TensorFlow and PyTorch
- Conducted model training and evaluation on CUNY's HPC cluster and Nvidia CUDA focusing on improving SOTA benchmarks

TECHNICAL PROJECT

Himalayan Connect NYC | *Full-Stack Resource Hub*

Feb 2025 – Present

- Built full-stack app with Next.js, React, TypeScript, and Prisma ORM, owning end-to-end dev lifecycle
- Implemented secure JWT auth, search/filter features, and Google Maps API for location-based resource access
- Iterating weekly with best practices to enhance performance, usability and feature set
- Integrated Cloudinary for image handling, storing URLs in the database for dynamic rendering | [Live App](#)

TRAINING AND CERTIFICATION

Java Training Course, Synopsizor

Dec 2021 – Jan 2022

- Focused on core Java programming, data structures, algorithms, and practical problem-solving techniques

Python for Everybody Specialization, University of Michigan

May 2021 – July 2021

- Hands on learning to gather, clean, analyze, and visualize data with Python

CodePath Cybersecurity Course

Feb 2021 - Apr 2021

- 14-weeks course with hands-on training in network security, ethical hacking, threat analysis, and secure coding practices through real-world labs and capture-the-flag challenges

AWS Academy Cloud Foundations

Aug 2020

- Completed hands-on labs with core AWS services (EC2, S3, Lambda, RDS, IAM, Cloudwatch), applying cloud concepts like VPC setup, IAM policies, scaling, and monitoring

CUNY2X TTP x Full Stack Academy

May 2019 - June 2019

- Completed a full-time 6-week PERN Stack Full Stack bootcamp. Led backend for a course registration app with Node.js, Express, PostgreSQL, and deployed to Heroku using Agile workflows and external APIs| [Repo](#)

LEADERSHIP

Organized and led an [Internship and College Info](#) for middle school and high school students in the community. Actively involved in facilitating the event and career conversations alongside a team of volunteers and panelists
